Printing Instructions for Evil Genius VS Spies

Printing the Card Set

The process is simple if you have access to a double sided printer. Download the Card_Set.pdf document and in the printing dialogue follow these steps.

> **Printing instructions for Macs:** Under "Copies & Pages", change Page Scaling to "None". "Auto-Rotate and Center" should be checked. Under "Layout", choose Two-Sided: "Long-edge binding".

> **Printing instructions for PCs:** Under "Paper Handling", change Page Scaling to "None". "Auto-Rotate and Center" should be checked. Click on Properties. The exact text will vary depending on your printer, but you want to Print on Both Sides, and set Orientation to Portrait.

If you are printing on thick card stock you must manually flip the pages since it is too thick for the printer to do it. The card set PDF is laid out such that every odd page is the face and every even page is the back. There are a couple pages that might be tricky to print so follow this procedure below.

> Print the Spy cards on pages 1-14 by printing out the odd pages and then printing the even pages on the back. Since the back is symmetrical it doesn't matter how you flip the pages.

> Then print the cards that are shared on pages 15 and 16. Make sure the card backs are correct.

> Print the Evil Genius' cards on pages 17-30 just like the Spy cards above.

> Print the Evil Plan cards on 31-34. The back is not symmetrical so make sure they are both the same direction after printing.

> Print the last page of Evil Plans on pages 35-36 separately because it is only half a page.

Printing the Rulebook

The rulebook can be printed back to back or single sided. Make sure the printer is set to landscape instead of portrait.

Printing the Evil Lair Mat

Follow the instructions in the Evil Lair Mat file.
